

January – Terry White

My subject matter is what I draw from life and my techniques are threadpainting, applique, patchwork, quilting and embellishing with decorative machine stitching. What is Threadpainting? Threadpainting is a method for creating original embroidery by machine. The feed teeth on the sewing machine are dropped or covered so that the fabric under the machine's needle can be moved in any direction to create lines, areas of color, and texture by stitches. All designs are created when the stitcher moves the fabric under the needle. Check out Terry's website at <http://www.threadpaint.com/index.html>.

This has been Terry's most popular beginner thread painting class for 4 years. The student learns the basics and creates textures with a variety of stitches created by her own two hands. Instruction includes a discussion of threads, tension, needles and fabrics. The student is inspired by the variety of effects that can be achieved by viewing Terry's art shared in class.

February 3, 2010 Rami Kim Lecture: Two by Two

This trunk show is Rami's new, fun way to show her award-winning pieces. When Rami creates an art-to-wear ensemble she makes matching quilts, bags, and dolls with the same designs and techniques. Over the years she developed so many matching pairs that she wishes to share these fun and beautiful sets, and to talk about how to apply the same techniques and designs to different projects as wearable arts, quilts, dolls & bags.
